

# Simran Kumari

Frontend Developer | B.Tech CSE Graduate | JavaScript | React | HTML | CSS

kumarisimran9593@gmail.com | +919060753584 | Jameshdpur, Jharkhand | <https://www.linkedin.com/in/simran-kumari-383228334/> | <https://github.com/simran9060>

## PROFESSIONAL SUMMARY

Results-driven Frontend Developer with a B.Tech in Computer Science and a strong foundation in modern web technologies including JavaScript, React, HTML, and CSS. Eager to leverage technical expertise and fresh perspective to build responsive, user-centric web applications while contributing to collaborative development teams. Committed to continuous learning and delivering high-quality code that enhances user experience and meets business objectives.

## WORK EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| <b>AI/ML Virtual Intern</b> — AICTE Edunet Foundation                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Jul 2025 – Aug 2025 |
| • * Worked on a Water Quality Prediction project using Artificial Intelligence and Machine Learning. * Used Python and machine learning techniques for data analysis and prediction. * Worked with water-quality parameters such as pH, turbidity, and conductivity. * Performed data preprocessing and developed a predictive machine learning model. * Gained practical experience in AI/ML workflows and predictive analytics.                                                                                        |                     |
| <b>Core Java Intern</b> — Internshala                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | May 2025 – Jun 2025 |
| • * Developed Java applications using Core Java and Object-Oriented Programming concepts. * Built GUI applications using Java Swing and AWT. * Worked with REST APIs and integrated API functionality into applications. * Applied Java programming concepts to practical application development. * Strengthened problem-solving, debugging, and programming skills.                                                                                                                                                    |                     |
| <b>Frontend Developer intern</b> — Ardent Computech                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Jun 2024 – Jul 2024 |
| • * Developed a responsive Coffee Shop website using HTML, CSS, and JavaScript. * Created user-friendly and responsive web pages for different screen sizes. * Implemented website layouts, navigation, styling, and interactive elements. * Applied frontend development and responsive design principles. * Gained practical experience in website development, debugging, and UI improvement.                                                                                                                         |                     |
| <b>Python intern</b> — Codezeal Technology                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Jun 2024 – Jul 2024 |
| • * Developed Python programs and applications using core programming concepts. * Worked with variables, functions, loops, conditional statements, lists, dictionaries, and file handling. * Applied Object-Oriented Programming concepts to practical programming tasks. * Debugged and tested Python code to identify and resolve errors. * Worked on small projects and practical coding exercises to strengthen problem-solving skills. * Gained hands-on experience in Python development and software programming. |                     |

| <b>Career Mantra AI</b> (HTML, CSS, JavaScript, React.js, Node.js, Express.js, Python, AI/ML)<br>Developed an AI-powered career guidance platform that helps students explore suitable career paths, skills, learning resources, and job opportunities. Built a responsive user interface and integrated backend services to provide personalized career recommendations. The project demonstrates practical application of web development, AI, and problem-solving to create a user-focused career assistance platform. |
| <b>Smart Trip Planner</b> (HTML, CSS, JavaScript, React.js)<br>Built a responsive travel planning web application that helps users explore destinations and organize their trips. Implemented interactive UI components, destination information, and trip-planning features using modern frontend technologies. Designed the application to provide a simple and user-friendly travel planning experience across different screen sizes.                                                                                 |
| <b>Water Quality Prediction using AI &amp; ML</b> (Python, Pandas, NumPy, Scikit-learn, Streamlit, Machine Learning)<br>Developed a machine learning application to predict water quality using parameters such as pH, turbidity, and conductivity. Performed data preprocessing, trained a predictive model, and created an interactive Streamlit interface for displaying predictions. The project demonstrates the practical use of machine learning and data analysis for environmental monitoring.                   |

## ACHIEVEMENTS

|                                                                                                                                                                                                                                                                                                                                                                 |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Top 3 in Class – Diploma in Computer Science & Engineering — Secured a position among the Top 3 students in the Diploma in Computer Science & Engineering program with 74.1% marks. Demonstrated consistent academic performance, technical understanding, and dedication to learning computer science fundamentals.                                            |
| AI/ML Water Quality Prediction Project — Successfully developed an AI/ML-based Water Quality Prediction project during the AICTE Edunet Foundation internship. Applied Python, data preprocessing, and machine learning techniques to analyze water-quality parameters and generate predictions, gaining practical experience in real-world AI/ML applications. |
| Completed Multiple Industry Certifications — Completed industry-recognized learning programs and certifications from organizations including Google, AWS, IBM SkillsBuild, TCS iON, Infosys, LinkedIn Learning, and Deloitte. Strengthened knowledge across software development, cloud computing, AI/ML, and professional skills.                              |
